

Third Eye Cats

NFT Series on DeSo

~ Open your third eye and behold your inner cat ~

NEW AWARDS!: For the first time, we're releasing a Boss Cat to the buyer of the most cats of each drop. At 4K resolution, these are the highest quality Third Eye Cats ever created.

Theme Packs: Look out for themes as they may have friends released in future drops. Themes will mostly only be (but not limited to) in 3's and just might be the ones to snag first.

Custom Cats: One custom animated Third Eye Cat NFT is awarded to anyone who owns five or more cats. Two custom animated Third Eye Cat NFTs are awarded to owners of three of the same theme.

Custom Cuteness Coins: Future tokens to be released for using as perks including custom NFTs, Merch, Plurrr Cat sticker packs, and more.

Unlockable Content: If purchased, along with the .gif file, the owner will receive an .mp4 version seamless loop at 720p and an image .jpg for storing or sharing on other platforms that allow higher bandwidth and upload file sizes.

These spiritually awakened kittens were born in 2013 as the viral Plurrr stickers Dank Franks made while working at a local print shop and went worldwide. Although the stickers have slowed down since, the fascination continues to grow along with the graphics and meaning behind each one. This concept has been in the works to be released as an NFT series for years but never felt like the right time, until DeSo was formed. Each Third Eye Cat is individually created without the use of any code or generative software.

With love,

Dank Franks & the Third Eye Cats Team
